Cultura inglesa - B2   **Period: 2021/ 2022**

High school / technical education
Electronics Technician - Liceu de Artes e Ofícios de São Paulo   **Period: 2017/ 2019**

Professional Summary

I am a specialized front-end development professional with extensive experience in technologies such as ReactJS, Next.js, TypeScript, and styling tools like Tailwind CSS and Styled-Components. I employ Test-Driven Development (TDD) methodology in conjunction with Vitest and Testing Library to ensure code quality. I have experience in creating documentation using Storybook. Currently, I have been involved in building the financial module of the company, while simultaneously migrating the main system to a more modern build tool, Vite.js.

In my free time, I am recreating Notion using GraphQL, Nuxt.js (Vue.js), and Supabase. I am also working on rebuilding my portfolio, incorporating 3D rendering with Three.js and React.
